GAS HOSE

**NBR/PVC rubber hose with braiding
exterior of galvanized wire.**

Distinctive red color for easy identification

Durable and flexible hose reinforced with galvanized steel mesh for increased durability and safety. Features a red marking for easy identification. Ideal for conveying liquefied petroleum gas (LPG), such as propane and butane, and offers good resistance to most noble gases. Perfect for use with stoves in animal farms, chicken rotisseries, gas barbecues, and more.

Temperature: -20 °C +70 °C (with sporadic peaks at 90 °C)

It is recommended to replace it after 5 years
